

## “PASS” PARENT LETTER

To the parents of \_\_\_\_\_:

Your baby had a hearing screen as part of the routine evaluation of all infants born at Aspirus Women’s Health Birthing Center at Aspirus Wausau Hospital.

The test was done on \_\_\_\_\_. Your baby passed the infant hearing screen. This is a good indicator that there is no suggestion of hearing impairment **at this time. Some hearing losses develop later in life. Your child’s hearing should be checked periodically. Hearing loss can occur during childhood for many reasons.**

Your baby’s ability to hear is very important. Hearing helps determine future social, speech, and language development. If you have any concerns regarding the speech, language, or hearing development of your child as he or she grows, please speak with an audiologist, speech and language pathologist or your child’s doctor.

Sincerely,

Aspirus Women’s Health Birthing Center
